

## Aloe Vera, Nature's Gift

### Oral Preparations

**Aloe Vera Gel** – This is the foundation product for treating many conditions related to epithelial tissues and immune system.

**Aloe Vera Gel with cranberries** – This fruit flavoured Aloe gel helps the urinary system. This is due to the natural urinary anti-microbial properties of cranberries.

**Aloe Vera Gel, with Chondroitin, Glucosamine, and Methyl Sulphonyl-Methane (MSM)** – With the 3 joint protecting agents, the Aloe gel can affect the musculoskeletal system. Applications include treating arthritis – to decrease pain and inflammation, improve joint cartilage and synovial fluid.

### Topical Preparations

**Aloe Vera soap** – Use to clean the skin of animals.

**Aloe Vera shampoo** – Particularly useful when there is a lot of hair. Leaves the fur very soft.

**Aloe Vera spray solution** – Use to rinse off wounds and prepare for further treatment. Cleans and aids healing.

**Aloe Vera gelly** – Useful for wounds, burns, skin trauma, and skin disease such as eczema and psoriasis.

**Aloe Vera propolis creme** – Given the natural antibacterial and antiviral property of bee propolis, the creme is particularly useful in treating infected skin. It is also suitable for use in dry skin.

**Aloe Vera Bee Propolis tooth gel** – Helps control the build up of plaque and tartar.

**Aloe Vera Sunscreen** – Animals with white hair in particular can benefit from this sunscreen. The skin underneath the white hair is pink and is very sensitive to ultra violet light. The sunscreen can protect the skin. The Aloe content in the sunscreen can treat any sunburn already developed.

**Bee pollen honey** – A natural sweetener ideal for home made dog treats etc. Not suitable for puppies.
